

“It always seems impossible  
until it’s done.”

NELSON MANDELA

In 2014, Solera launched LIFT to LIFE, a new LIFT initiative that raises the bar in volunteerism.

The program provided six high-performing associates the opportunity to dedicate themselves to a 4-6 month mission anywhere around the world to build sustainable roots for lasting change.

Audatex South Africa is proud to have such compassionate and active associates in our local communities through Jan’s van der Waart.

Jan van der Waart, of Market Scan in Holland (a sister company to Audatex) was selected to take part in this initiative. His mission is to deliver a centre for young disabled children within the township **Gamalakhe, South Africa**. This centre is set out to provide our children with the second chance they deserve. Not only will we be building their future, but developing a safe, hygienic and accessible environment in which provision will be made to care for their individual needs. Teaching them valuable life skills and equipping them with the tools that they need to structure not only a bright but a sustainable future.

In addition to this, Jan is focusing on individual specialized medical care, and creating an environment of collaboration and education between the children, their families, the staff, and local organizations to create a sustainable impact.

Through the **LIFT to LIFE** program, Jan and his wife Louise have the opportunity to devote their time and resources to give back to the place and people they love.

Audatex South Africa would be assisting Jan with his mission by hosting fund raising events between September and October.

Do your bit to make a difference in the lives of the children in the Gamalakhe community. Watch this space for the Lift to Life Golf Day, Fun Day and an fund raising theatre show.

Learn more about Lift to Life by following Jan and Louise on Facebook, Twitter or on their website:

With an eventful Woman's month drawing to a close Spring is in the air but don't breath in too deep...., only 4 months to the festive season madness, so get quoting to meet those 2014 targets.

## Audatex, sharing the Knowledge

Smiling faces was the order of the day when the Audatex team handed dozens of reading books to the Allanridge Secondary school in Midrand.

Allanridge Secondary is extra special as it services as a double whammy of knowledge as the premises is used to run the Adult basic education training centre at evenings, giving Adult learners an opportunity to complete their secondary education.

Do your bit to help with our Lift to Life Program. Play a round of Golf at our Golf Day in September or buy a ticket for a fun night out at our Barnyard event in October. **More details to follow.**

## Final Costing

Should you require any information or assistance with Final Costing, please feel free to [contact us](#).

## Updated Model Listing

Keep up to date on the latest model listing.

## NB: Remote Signal Jamming

"It's not enough to press the lock button on your car remote and walk away".

Remote signal-jamming tactics are on the increase, allowing thieves to help themselves to your valuables including your Audapad"

Please Note "almost all" insurance policies including the one covering your Audapad, requires evidence of violent and forcible entry to ensure coverage.

We urge you to take that extra second to ensure your vehicle is locked before walking away. [Drive Safe and Lock up](#).

## New AudaTexan's

Audatex South Africa is proud to announce the formation our very own in-house development team. A huge welcome to Chris, Devlin and Shirley, here's to increasing our efficiency and productivity. "No Pressure"
