PAINT OPTION CODES

1. How the parts are being painted
 - Painting of parts inside & outside on the vehicle (standard)
 - Painting of „bolt-on“ parts inside & outside completely off vehicle
 - Pre-paint of „bolt-on“ parts inside only off vehicle

 - **Depending on the respective paint system, the paint option codes can change the paint time and/or the preparation time. If a specific material calculation has been selected (via identification block codes 51/81) the paint material cost may change as well**
2. Standard - Painting parts on the vehicle
 - Y6 - this repair is standard in the Audatex system. The part is painted inside & outside on the vehicle. Usually there is no option code required for this
3. Y8 - Painting „bolt-on“ parts off vehicle
 - This method can be applied for bolt-on parts to be painted completely off vehicle
4. Y7 – Pre-painting parts off vehicle
 - This method is applicable for painting of hidden or inaccessible sections of a new part. These sections are pre-painted and the part re-fitted with the paintwork being completed on the vehicle
